The Sarix® IE10 Series is a 1.3 megapixel (MPx) network indoor/outdoor rugged fixed dome camera designed with industry-leading image quality and high performance processing power. Its sturdy metal design is vandal and tamper resistant and is designed for worry-free use in a wide range of environmental operating conditions.

The IE10 Series is perfect for use in environmental air handling spaces. The back box is plenum rated per 2008 NEC article 300.22(C)(2).

Sarix technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are considerably smaller making high definition video more affordable.

Fixed Dome Camera

The IE10 Series can be ordered in either color or day/night models, with or without lenses installed. All models include advanced low-light technology and a camera in an outdoor enclosure that is ready to install. The day/night model has a mechanical IR cut filter for increased sensitivity in low-light installations. These cameras accept a wide range of megapixel varifocal CS-mount lenses.

The IE10 Series supports two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The streams can be configured in a variety of frame rates, bit rates, and group of pictures (GOP) structures for additional bandwidth administration.

Built-In Analytics

The Pelco Camera Sabotage behavior is a standard feature of the IE10 Series. This behavior detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or covered with a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.

Web Interface

The IE10 Series uses a standard Web browser for powerful remote setup and administration.

Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The IE10 Series supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

Video Systemization

The IE10 Series easily connects to Pelco IP and hybrid systems such as Endura® version 2.0 (or later) and Digital Sentry® version 4.3 (or later). The camera is also compatible with Digital Sentry NVs (DS NVs), a full-featured video management software, which is available as a free download at www.pelco.com. DS NVs includes four free Pelco IP licenses and allows for the management of video from up to 64 cameras.

The IE10 Series features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) for interfacing with Pelco’s network cameras.
